OFFLINE
SPEECH TRANSCRIPTION

Cut Spending and Reduce Turnaround Time of Meeting Transcription Workflows

🏛 **City Councils**

⚖ **Courts**

🏢 **Public and Corporate Institutions**

Boost administrative modernization of your organization through cutting-edge speech transcription technology.

Increase efficiency in delivering of public/corporate services, such as comprehensive reports of city council and court sessions, or, even, corporate board meetings.

Building on the most recent advances of automatic speech transcription technology in conjunction with effective language adaptation techniques, AUDIMUS. SERVER creates complete (verbatim) transcripts – rather than just a summary – of all utterances produced in a meeting, in less than play-back time.

# FAST, ACCURATE, COST EFFICIENT TRANSCRIPTION OF MEDIA FILES

AUDIMUS
SERVER
OFFLINE
SPEECH TRANSCRIPTION

WHAT IS IT FOR

Given an audio recording of a session or meeting, Audimus Server speech to text processing will, automatically, generate a full text transcription of the spoken contents. Instead of a blank page, you will be given a prefilled and reliable transcription document. With time and overall coast reduction in mind, maximize your workforce productivity and simplify the painful burocratic process of official and administrative document creation.

You can export the final result to an extensive number of textual formats, in order to optimize and streamline your current workflow.

Indexation and Archive

HOW IT WORKS

FAST AND RELIABLE TRANSCRIPTIONS

With this product we offer to our customers a set of new tools to tackle the complex task of manual transcript pre-recorded media files (audio and video). The fineness of the speech to text transcription depends, greatly, on the input file audio quality, but when that quality is ensured the final will meet all your expectations. All processes are performed below source file duration, so you can easily integrate Audimus Server in an automated prearranged workflow. If you don't want to start from scratch, this is the solution you're looking for.

ADMINISTRATIVE MODERNIZATION

This innovative tool is intended to promote a modernization of organizations where it operates. The complex task of transcribing, in full, the contents of meetings or long duration sessions is now in reach. Maximize and boost your workforce productivity, equipping them with a tool that really makes a difference.

WIDE VARIETY OF OUTPUT FORMATS

Regarding the export formats, we provide a variety of formats - .txt / .docx / srt / among others.

STORAGE AND CONTENT SEARCH

Store the audio and transcripts for future indexed search. Quickly find specific textual passages and listen to the full media source file.
