FAST, INTUITIVE AND ACCURATE TRANSCRIPTION OF SPOKEN CONTENT

VOX CONTROL

ENHANCED
SPEECH RECOGNITION

WHAT IT IS FOR

Studies carried out show that the creation of documents using speech recognition technology is significantly faster, mainly due to the higher number of words produced per minute, when compared to these being typed out even by an experienced typist.

VoxControl allows your words to be understood and transcribed automatically and accurately when talking to a computer. Save time, reduce costs and maximize resources using a simple, innovative and intuitive application that understands you.

WHAT IT ENABLES

Simple and intuitive

Promote work efficiency

Reduce the time and cost associated with transcripts

Specialized vocabulary by business area

Automatic integration with text editors

AIMED AT

HEALTHCARE SERVICES

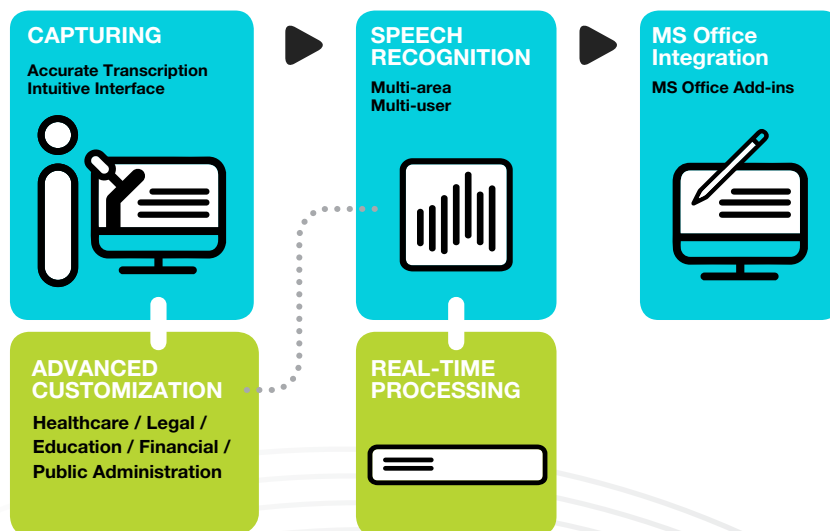

LEGAL FIRMS

FINANCIAL SERVICES

INSURANCE COMPANIES

EDUCATION

PUBLIC ADMINISTRATION

HOW IT WORKS

FAST AND RELIABLE TRANSCRIPTS

We provided our customer with the necessary tools to effectively tackle a complicated and overbearing problem that is manual transcription of recorded and administration documents. Based on innovative and reliable speech recognition technology, VoxControl knows and understands what you means - right from the start. Just talk and the result is produced automatically and without delay.

BUREAUCRATIC MODERNIZATION

This innovative software was designed to promote and to facilitate the modernization process of the organizations in which it operates. The complex task of fully transcribing the content of meetings or long term sessions gets easier, allowing more efficient use of human and administrative resources.

MULTI-AREA AND MULTI-USER

The VoxControl system is natively adapted to a wide range of thematic areas and industries. The support for specific terminologies is constant and always evolving. It is possible to add new entries to an already created model or even create completely new areas. Aiming to achieve the best possible results, the recognition engine can also be adjusted to the user's voice and pronunciation using the VoxTraining application.

INTUITIVE AND MINIMALISTIC

From the minimalist approach to the design of the graphical interface, VoxControl allows easy and intuitive access to speech recognition benefits. Upon installing to the first word is just a simple step.
